Why Choose Maynardville?

OUR NET PROMOTER SCORE (NPS)

In 2015 Maynardville scored #1 out of all Clayton Home Building facilities in Servicing, finishing with a 79.70%. In 2016, Maynardville finished strong at #2, right on the heels of first place.

NPS is based on the Customer's Experience from walking into a retail center to the customer happily settling into their new home. This includes service issues being completed in a satisfactory time frame and great communication being present throughout the entire process.

"Maynardville strives to stay at the top of the game. That makes us all strive to be the best we can be and to be the best in the company."

JEFF "JJ" JENKINS, SERVICE MANAGER

Started at Clayton in 1985

"It's important to me to coordinate the correct part deliveries with our retailers. I want to represent the plant as best I can. It means a lot to our retailers and the new homeowners knowing Maynardville did our best to provide them with the best experience."

SHARON CARPENTER, PARTS MANAGER

Started at Clayton in 1999

Why Choose Maynardville?

THE RETAIL EXPERIENCE WITH OUR PRODUCT

"Appeals to all incomes/backgrounds/age groups from 'millennials to baby boomers'... affordable to the masses...and durability."

HC #848, CLAYTON HOMES, NORTHPORT, AL

"Maynardville makes a great home—one of fine quality of the Clayton Lines. What truly sets Maynardville apart are the Market Development Managers and Service Department! If an issue arises, you have complete trust Maynardville Plant will help you!"

HC #046, CLAYTON HOMES, GRAYSON, KY

"Exceptional sales support...fast, accurate, and dependable."

HC # 243, OAKWOOD HOMES, ELIZABETHTOWN

"Our lot has added four new brands this year and Maynardville, by far, has had the biggest impact. Very affordable homes that still offer the customization our customer want."

HC# 1049, TRUVALUE HOMES, ALEXANDRIA, AL

"I would sum it up with three words: quality, variety, and options! Lots of floor plans, lots of options, energy efficient, and quality of construction!"

HC# 853, CLAYTON HOMES, GEORGETOWN, KY

"The product is a sound investment for me and my customers. I know that I can back up my claims because the products are very consistent in quality. I can count on the plant for help with any issues that occur and get parts if needed. Service is important and I always feel that any problems that might come up will be addressed and resolved."

WAYNESVILLE HOUSING MART, LLC, NORTH CAROLINA

"Of course the house is great quality and the pricing is where it needs to be, but the reason we choose Maynardville is the people that work there. Always attentive to our needs, and a Sales Manager, Sales Rep, and most importantly a Service Manager that is second to none!"

HC # 31, CLAYTON HOMES CLINTON HWY, KNOXVILLE, TN

LED Lighting

TOP 10 BENEFITS

1: LONG LIFE

LED Lighting features long operational life time expectations. LED bulbs and diodes have an outstanding operational life of 11 years of continuous operation or 22 years of 50% operation.

2: ENERGY EFFICIENT

LED lighting features significantly higher energy efficiency and is today's most efficient mode of illumination. It has an estimated energy efficiency of 80%–90% compared to conventional light bulbs.

3: ECOLOGICALLY FRIENDLY

LED lighting is significantly more eco-friendly than traditional incandescent lighting. LED lights are free of toxic materials and are 100% recyclable, reducing carbon footprint by up to a third.

4: DURABLE

LEDs are built with sturdy components that are highly rugged and can withstand even the roughest conditions, including shock, vibrations, external impacts, and exposure to weather.

5: ZERO UV EMISSIONS

LED lighting features negligible UV emissions. It produces little infrared light and close to no UV emissions. Because of this, LED lighting is highly suitable for the illumination of UV sensitive objects or materials.

6: DESIGN FLEXIBILITY

LED lighting can be combined in any shape to produce highly efficient illumination. Individual LEDs can be dimmed, resulting in a dynamic control of light, color and distribution. Well-designed LED illumination systems can achieve fantastic lighting effects, not only for the eye but also for the mood and the mind.

7: IMPERVIOUS TO CLIMATE

LED lighting ideal for operation under both extremely hot and cold outdoor temperature settings. This makes LED illumination the ideal choice in outdoor winter settings.

8: LIGHT DISPERSION

Well-designed LED illumination systems are able to deliver light more efficiently to the desired location. Designed to focus its light, LEDs can be directed at a specific location without the use of an external reflector.

9: INSTANT LIGHTING

LED lights brighten up immediately upon being powered on and can be switched on and off frequently without affecting the LED's lifetime or light emission.

10: LOW-VOLTAGE

LED lighting can run on low-voltage power supply. This makes it easy to use LED lighting in outdoor settings by connecting an external solar-energy source.

Product Lines

BLAZER EXTREME

The Blazer Extreme series is designed to match the modern American lifestyle. The Blazer Extreme series can make your American Dream become a reality!

BLUE RIDGE

The Blue Ridge home series can help satisfy your American Dream. These floor plans provide the ideal ambiance for the contemporary American family. Whether you are a first-time homebuyer or you're simply looking to downsize, this series is just right for you.
